DINO COMPENDIUM

by Matthias Bartz

Dino COMPENDIUM

Ferrari Dino V6 Compendium - Dino 206 GT / 246 GT / 246 GTS – Detailed guide to the development of individual models

This book categorizes the road vehicles Ferrari Dino 206 GT / 246 GT / 246 GTS and documents the differences between each series, highlights their original features, and points out their unique Pininfarina design. All topics have been extensively researched and are well documented in cases of contentious issues. On 396 pages, divided into 16 chapters and with the help of 711 illustrations, no questions concerning the first road-approved mid-engine Ferrari vehicle are left unanswered. None of Ferrari's vehicle types has ever been described as meticulously or has been presented as attractively as in this publication. Yet the book does address itself not only to owners of a Dino and expert audiences but – with its fabulous illustrations of one of the most beautiful ever built sports cars of all times – will impress all readers with a general interest in automobiles.

It was elaborately produced in Germany, with five-colour printing on high quality paper, including a slipcase and partial UV varnishing of the cover. The book's dimensions are 25 x 30.5cm and its weight amounts to 3.4kg.

The book is offered for EUR 160.00 (incl. VAT), plus shipping costs, and can be ordered exclusively at www.dino-book.com.
